

380 incoming line distribution box

Product Wiring Diagram

Overview

With a rated voltage of 380V and current options ranging from 630A to 10A, this cabinet meets the GB/T 7251. 2-2023 standard, ensuring safety and performance. Core Business and Supporting Services Focusing on full-scenario needs, we offer three core services: new factory construction supporting (power planning adaptation, power distribution cabinet customization, project node coordination, connecting architectural and new energy needs to assist in early. The Fulleteo XL-21 series is an indoor, floor-standing power distribution cabinet engineered for excellence. It serves as the central hub for receiving and distributing electrical energy in low-voltage systems up to 380V. It integrates functions such as overload protection, short-circuit protection, leakage protection, metering, and intelligent control. Widely applied in buildings, industrial. Discover 380V power distribution box solutions with CE certification, ideal for reliable cable converter box setups in industrial settings. The low-voltage fixed distribution cabinet is an assembled structure, with side frames. Model YNXL, Rated Voltage 380V, Rated Current 630A~10A, Conforming to Standard GB/T 7251. Installation Methods: Wall-mounted and floor-standing installation options are available.
