

4N33 Optocoupler Amplifier

Overview

Description: Optocoupler, Photodarlington Output, High Gain With Base Connection.
Manufacturer: Vishay Siliconix. 4N33 Pinout, Dimensions and Specifications. Fairchild Semiconductor was a pioneering semiconductor company that was founded in the late 1950s. The company was known for its innovation in the development of the first commercial transistor and for its contributions to the advancement of the integrated circuit technology. Switching can be achieved while maintaining a high degree of isolation between driving and load circuits. These optocouplers can be used to replace reed and. The 4N32, 4N33 have a gallium arsenide infrared emitter optically coupled to a silicon planar photodarlington. Low power logic circuits Telecommunications equipment Portable electronics Solid state relays Interfacing coupling systems of different potentials and impedances.
