

Aluminum bracket for optical cable

Overview

Mainly used for 50-200m short span corners, tensile strength, terminal and other towers, not only suitable for overhead optical cables, but also for anchoring installation of overhead conductors, pull wires, etc. AFL offers two coil brackets for slack storage of ADSS and OPGW fiber optic cable. The CB-30-3AL is 30 inches wide and stores up to 80 ft. It is used with AFL's Apex® X-3, X-3H, X-2 and X-2S, LG-250, LG-350 and LG-350-AC sealed splice closures. This system provides maximum protection for fiber cable, and contains no conductive properties. Requires only one tool for. For cable entrance holes and to keep Out insect prevent dust from setting inside Cable exit holed (or entry) for cable to connect to fiber optical terminal Equipments or vice versa. Is used to connect an overhead fiber cable to optical devices or a house, widely. The UPB bracket is manufactured from aluminum alloy with correspondingly high mechanical strength. Encompass everything from distribution terminals. A configuration tool that allows users to import layouts into a web-based tool, design desired raceways in a 3D format, and export detailed drawings and BOMs that can used for easy installation and ordering.
