

Australian Transport Cable Tray Styles

Overview

Wire Mesh Tray (Basket Tray): Made from a grid of steel wires, this type is lightweight, super flexible, and can be easily cut and shaped on-site. Perfect for data cabling and lighter-duty jobs. Solid Bottom Tray (Unvented): Offers the most protection for sensitive cables but. Cable tray provides strong and reliable support for electrical wiring in commercial and industrial projects. Cable trays are able to hold heavy loads and also make. EzyStrut offers some of the strongest cable trays in their classes, and produces them to a very high structural and visual standard. Think of it as a bridge or a shelving unit specifically designed for cabling. Instead of running dozens of individual conduits, you can lay multiple cables neatly onto a single tray.
