

Can a 300Mbps router be used with a 500Mbps fiber optic connection

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. This guide will break down everything you. Now we have a TP-Link Archer A7 AC1750 router and whilst it has done us proud I do wonder if it is man enough to accept possible speeds of up to 500Mbps from the internet. Nowhere have I been able to find out what speed INPUT it will accept. Routers designed for DSL (which uses phone line inputs) or cable (which uses coaxial inputs) won't work. Some fiber internet plans. Can i use a single fiber with lc connector to connect two switches?

So this week I replaced 3 Unifi switches with Mikrotiks. However if you still get 200-300 Mbps even on wired, it's possible that your ISP is overloaded and is throttling down connections, and there is a chance you'd get even further throttled down on an even lower tier of service.
