

Distribution box spring pin

AI Overview

Spring pins, often made of stainless steel, are used in distribution boxes to secure doors and components with a self-locking, resilient mechanism. Overview Spring pins, also known as roll pins or coiled pins, are designed to fit into holes and provide outward pressure to lock components in place. They are typically made from high-quality stainless steel for corrosion resistance and durability, making them suitable for both indoor and outdoor distribution boxes. The pins can be slotted or coiled, allowing them to compress during installation and expand to hold firmly in place.

Types and Features

- Flat Pin Spring Hinges:** These pins are integrated into hinges for cabinet doors. They often include a high-elasticity spring that automatically rebounds and locks the door, ensuring it remains tightly closed without manual adjustment. They are anti-picking and anti-dropping, providing extra security for sensitive equipment.
- Slotted Spring Pins:** Made from a rolled metal sheet with a gap, these pins compress to fit into holes and grip components securely.
- Coiled Spring Pins:** Spiral-shaped pins that expand and contract to fill uneven or irregular holes, ideal for high-volume or repeated use environments.

Installation and Compatibility Spring pins for distribution boxes are generally easy to install. Many products come with adjustable hole spacing and installation screws, allowing replacement or retrofitting in standard distribution boxes, server cabinets, or industrial control boxes without additional drilling. Installation typically takes only a few minutes.

Material and Durability Most spring pins for distribution boxes are made from 304 stainless steel, which provides strength, corrosion resistance, and smooth operation over long-term use. Polished surfaces prevent sticking and facilitate cleaning.

Purchasing Options

- Amazon:** Offers sets of flat pin hinges with screws for distribution boxes, suitable for DIY or replacement projects.
- McMaster-Carr:** Provides a wide range of spring lock pins in various sizes and styles, with fast delivery.
- Grainger and Western Wire:** Supply slott...
