

## **Does the power distribution box in the computer room need to be sealed off**

### **Overview**

Unused openings in boxes, raceways, auxiliary gutters, cabinets, equipment cases, or housings shall be effectively closed to afford protection substantially equivalent to the wall of the equipment. The conductors and equipment required or permitted by this subpart shall be acceptable only if approved, as defined in § 1910. Examination, installation, and use of equipment - Examination. Electric equipment shall be free from recognized hazards that are likely to cause death or serious. For trouble-free production and protection of the installed electronic devices, the modular control cabinet must be optimally sealed in its overall construction. This includes the rear wall, side panels, doors, door handle and ventilation grille with climate filter for the air intake. Computer rooms (or “data centers”) have an increased risk of fire, because of the electrical energy used to run the machines, the heat generated by equipment used for both IT loads and non-IT loads (i. Included in this list of equipment is switchgear, uninterruptible power supplies (UPS), static transfer switches, switchboards, transformers, power distribution units (PDU), remote power panels (RP, panelboards, rack. NFPA LiNK is an innovative digital platform that provides instant access to 1,400 NFPA codes and standards including the NEC, along with exclusive expert commentary, visual aids, and more. 26 are specific to working spaces about electrical.
