

Dust removal from distribution boxes

Overview

Actionable dust control in warehouses: process extraction, HEPA air scrubbers, and vacuum-only cleaning with M-/H-Class filtration to protect people and product. Warehouses and packaging lines generate cardboard, plastic, and pallet dust, with added powder hazards in food and chemical logistics. Control is achievable with simple, repeatable. Dust rapidly becomes airborne in warehouses thanks to the movement of dry goods, boxes and industrial vehicles. Additionally, in areas where vast volumes of dusty bulk materials are delivered and discharged from vehicles, dust becomes a problem. Often, there is so much dust in the air that it is. Outdoor distribution boxes spend years outdoors, and the most annoying thing is the ever-present, penetrating dust. This can trigger returns, affect product quality and cause more returns – ultimately. With decades of experience in dust extraction and filtration technology, Riedel Filtertechnik is a leading provider of industrial dust collection systems (DCS) for reducing dust emissions in production processes. In addition, for some special interfaces.
