

Fiber Optic Cable Distribution Frame Cabinet

Overview

Fiber Optic Distribution Cabinet, short for FDC, is specially used for cross connect of fiber optic feeder cables and distribution cables in Fiber to the Home network. They protect connections with a lockable front door and side panels that can be unclipped. Achieve successful cable management, handle high amounts of fiber cable and add density to fiber frames with the new DCX Optical Distribution Frame (ODF) System which features innovations like flippable cassettes, modular frame design and multiple configuration options. The ODF System Components. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function.
