

Fireproof and fire-resistant cable trays from the Netherlands

AI Overview

Stago, Meka Pro, and Beemster Electrical Solutions offer certified fire-resistant cable trays suitable for Dutch installations. Stago Cable Trays Stago cable trays are manufactured in the Netherlands and are designed for high strength, flexibility, and fire safety. They feature double return flanges and reinforced tray designs for excellent load capacity and cable protection. Stago systems are certified according to DIN4102-12 for fire resistance classes E30, E60, and E90, making them suitable for demanding commercial, industrial, and data center installations. The trays are available in multiple heights, widths, thicknesses, and finishes, including perforated, reinforced, and closed designs, with quick assembly via the Unilock coupling system ensuring electrical continuity and equipotential bonding (Wibe Group).

Meka Pro Fire-Resistant Systems Meka Pro specializes in fire-resistant cable support systems tested according to EN 1363-1 standards. Their products are fire-tested with installed cables, ensuring that critical electrical equipment continues operating during a fire. Meka Pro offers over 1,200 fire-tested standard products, emphasizing cost-effective, safe, and reliable installations. The systems are designed to prevent collapse and maintain clear rescue routes, and they use materials that minimize toxic flue gases. Installation must follow manufacturer instructions and comply with international standards, ensuring safety and compliance (Meka).

Beemster Electrical Solutions Beemster provides a wide range of CPR-certified cable support systems, trays, and conduits in the Netherlands. Their products are available in galvanized steel, aluminum, stainless steel, and synthetic materials, offering corrosion resistance and durability. Beemster emphasizes construction reliability, product finishing, and ease of installation, with all systems compliant with EN 50575 (CPR) and Dutch NEN...
