

Georgia Energy Internet Initiative

Overview

26 of Georgia's EMCs have made broadband project announcements with plans to provide approximately 339,000 homes and businesses with high-speed internet service in 108 Georgia counties through affiliates and partnership agreements. Google announced an Energy Impact Fund in partnership with Georgia Power to support programs that expand access for families to energy-saving technologies that will lead to lower electric bills and stronger local energy systems across Georgia. But without access to high-speed internet, most of the state's rural communities cannot compete in today's. The Network Readiness Index (NRI) is one of the leading global indices on the application and impact of information and communication technology (ICT) in economies around the world.
