Surface-mounted distribution boxes are available in modular and fixed designs, offering customizable sizes, materials, and protection levels for safe home electrical installations. Key Features and Options

- 1. Modular and Size Options** Surface-mounted distribution boxes come in a variety of sizes, typically measured in modules (TE or PD units). For example, BOXEXPERT offers enclosures ranging from small 2-5 module units to larger 12-54 module setups, allowing flexibility depending on the number of circuits and devices you need to install. Panasonic provides 16- and 32-module modular boxes with horizontal and vertical expandability. Solera's Arelos series ranges from 2 to 56 modules. Clopal offers 2-4 way boxes suitable for homes and small offices.
- 2. Materials and Protection** Common materials include polycarbonate (PC) and acrylonitrile butadiene styrene (ABS), which provide durability and impact resistance.
