

Hospital Lithium Battery Cabinet Anti-Static

Overview

Store or ship lithium batteries in this military-grade, UN Rated case with Fire Retardant Anti-Static (FRAS) lining to reduce risks. Designed to minimize the risks associated with thermal run-away events while shipping or storing lithium-ion batteries. Lithium-ion batteries are the driving force behind today's portable power revolution—powering everything from electric vehicles to industrial equipment, tools, and communication systems. Its insulation is composed of high-density fibre panels, free from fibroceramic materials, designed to withstand high temperatures of up to 800°C. It is therefore important that the correct storage and maintenance conditions are followed to reduce the potential of any hazardous occurrences. These cabinets are designed to manage fire hazards, temperature fluctuations, gas accumulation, explosion risks, and structural containment. Durable, high-strength aluminum construction.
