

How many ports does the terminal box have

Overview

This Fiber MST Box offers diverse connectivity with 8 ports, each supporting single-mode G. An Access Terminal Box (ATB), also known as a fiber access socket or fiber pizza box, is an indoor optical connection device used to link fiber drop cables with the optical distribution network (ODN). It integrates a splice tray, pre-terminated drop cables (1, 2, 4, or 8 fibers), fiber patch cords. Our optical termination boxes have many specifications for you, such as a 2 port fiber termination box, 4 port fiber termination box, 6 port fiber termination box, 8 port fiber termination box, 12 port fiber termination box. Compatible with SC, LC, FC, and ST adapters, our enclosures are manufactured with durable materials to provide long-lasting protection and reliable performance. It integrates fiber splicing, splitting, and storage within a compact and weatherproof design, offering robust protection and streamlined. Premium-Line FTTH distribution box is aim designed for multi-purpose applications in FTTH projects, the dual layer design supports direct termination, and also FTTH distributions via mini splitter built in, available for from 1:2 to 2:32 distributions with Premium-Line FTTH distribution cable.
