

How much does a 96-pin connector box cost

AI Overview

A complete 96-pin connector kit typically ranges from \$50 to \$150 depending on the manufacturer, type, and included components. Overview Complete 96-pin connector kits generally include the connector housing, 96 crimp contacts, and sometimes screws or board locks. For example, the Harwin M83-LFC1F2N96-0000-000 kit features a triple-row housing with hexagonal socket jackscrews and 96 loose barrel crimp contacts, suitable for 24–28 AWG wire, with gold-plated contacts for reliable connectivity. Similar DIN 41612 96-pin connectors are available in right-angle PCB male Eurocard configurations, often used in VMEbus and telecommunications systems. Price Range Harwin Complete Kits: Typically around \$100–\$150 depending on supplier and shipping. DIN 41612 96-Pin Connectors: Individual connectors can range from \$50–\$120 per unit, with bulk or box sets potentially offering discounts. Online Marketplaces: eBay listings for 96-pin connectors show prices starting from \$40–\$60 for small quantities, but complete box sets with all pins and accessories may cost more. Factors Affecting Price Connector Type: Backplane, Eurocard, or wire-wrap versions have different costs. Contact Material: Gold-plated contacts are more expensive than tin-plated. Included Accessories: Kits with crimp tools, screws, or spare contacts increase the price. Supplier and Shipping: Prices vary between distributors like Mouser, DigiKey, Harwin, and eBay. Recommendation For a complete 96-pin connector box set, check suppliers like Harwin, Mouser, or DigiKey for kits that include all contacts and housing. If cost is a concern, online marketplaces like eBay may offer lower-priced options, but verify that the kit includes all necessary components for assembly.
