

How much does a plastic fiber separation box cost

AI Overview

Plastic fiber separation boxes typically range from \$10 to \$150 or more depending on port count, material, and configuration. Factors Affecting Price

Port Count and Capacity Boxes can accommodate 2 to 48 ports, with higher port counts generally costing more. Pre-loaded units with adapters and pigtails are more expensive than empty enclosures.

Material and Durability Common materials include ABS, PC+ABS, polypropylene (PP), or polycarbonate (PC). Weatherproof or UV-resistant boxes for outdoor use are priced higher due to enhanced durability.

Configuration and Features Indoor vs. outdoor rated units, pre-loaded adapters, splice trays, and locking mechanisms influence cost. Units with integrated PLC splitters or multiple splice cassettes are more expensive.

Brand and Supplier Suppliers like Bwnfiber, UnitekFiber, and Primus Cable offer competitive pricing, often with bulk discounts. Direct factory orders from China may reduce cost but involve shipping and import fees.

Type	Port Count	Approximate Price (USD)
Basic indoor plastic box	2-6 ports	\$10-\$25
Standard indoor/outdoor box	8-12 ports	\$25-\$60
High-capacity distribution box	24-48 ports	\$80-\$150+
Pre-loaded with adapters/pigtails	2-24 ports	\$40-\$120

How to Obtain Exact Pricing Contact suppliers directly: Many manufacturers provide catalogs and quotations upon request. Download product catalogs: Bwnfiber offers downloadable catalogs for all plastic fiber distribution boxes. Request bulk pricing: For large-scale FTTx or network projects, suppliers often provide discounts.

Summary Plastic fiber separation boxes vary widely in price depending on port count, material, indoor/outdoor rating, and pre-loaded features. For precise pricing, it is recommended to contact manufacturers or distributors directly, as listed on Bwnfiber, UnitekFiber, and Primus Cable. This ensures you rec...
