

Iranal Distribution Box

AI Overview

An Iranal Distribution Box is an electrical enclosure used for safe and organized power distribution, typically in residential, commercial, or industrial installations.

Overview and Purpose A distribution box, also known as a distribution board or electrical panel, is designed to distribute electrical power from a main supply to multiple circuits while providing protection through fuses or circuit breakers. These boxes are essential for centralized or decentralized electrical installations, ensuring safety, modularity, and efficient energy management in buildings or industrial plants.

Materials and Construction Distribution boxes can be made from metal (iron or steel) or flame-retardant plastics such as ABS, PC, or PS. Metal boxes offer durability and stability, while plastic enclosures provide lightweight, corrosion-resistant, and impact-resistant options. They are available in various sizes and configurations, including 6, 10, 14, 20, 22, or 36 ways, to accommodate different wiring and circuit requirements.

Features and Standards

- IP Protection Ratings:** Boxes can range from IP65 to IP67, providing protection against dust and water ingress.
- Modularity:** Many distribution boxes allow for pluggable installation, enabling flexible configuration for power, signal, and data distribution.
- Compliance:** High-quality boxes comply with IEC standards such as IEC 61439 for low-voltage switchgear and IEC 61535 for connector systems.
- Design:** Options include wall-mounted, floor-mounted, or embedded installations, with features like key latches, hinged doors, and transparent windows for monitoring instruments.

Applications Iranal distribution boxes are suitable for:

- Residential buildings:** Power distribution for apartments or houses.
- Commercial buildings:** Offices, shopping centers, and smart building automation.
- Industrial plants:** Machinery, control systems, and harsh environments requiring robust enclosures.

Sourcing and HS Codes For import/export purposes, distribution boxes from Iran can be identified using HS codes, which classify them u...
