

Lc fiber optic terminal box with 8 ports

Overview

The L-com LCFTB-108-LCA FTTH Terminal Box presents a cutting-edge solution for indoor fiber optic termination and distribution of optical cables. Crafted with sturdy metal, this wall-mountable box guarantees durability and reliability for your network connections. The 8 ports metal fiber termination box is similar to the fiber optic patch panel in appearance and function, which designed to connect optical fiber cable and pigtail within building entrance locations and other indoor wall mounted environments. This compact fiber unit is small and lightweight, making it especially suitable for mini-network terminal distribution, providing termination, fusion or mechanical. The wall-mounted optic fibre termination box allows for easy organization of optic fibre cables (up to 4 fibres, depending on the installed adapters).
