

Outdoor power distribution box 380

Overview

Also known as a Cable Branch Box, this unit is engineered for reliable power distribution at cable nodes within 10kV to 35kV systems. Designed for underground or outdoor distribution systems, the Cable Distribution Box offers a tamper-resistant and weatherproof solution for medium voltage control and protection. It includes fault interrupters. Stackable, splash-proof housing made from a special rubber compound for continuous load. Resistant to a variety of oils, greases, gasoline and acids, UV and ozone radiation. Housing resistant to temperatures from -30 °C to +80 °C. The photovoltaic grid - connected box is used to connect and regulate the interface between photovoltaic power generation systems and the power grid. This enables comprehensive monitoring. Reliable sockets: AC220-380V 240-415V CEE sockets and 2 pieces 200-250V universal outdoor sockets ensure great reliability.
