

Portuguese Explosion-proof Distribution Box

AI Overview

A Portuguese fixed explosion-proof distribution box is designed to safely distribute electrical power in hazardous environments, preventing ignition risks while complying with international safety standards.

Key Features

Construction and Materials: Typically made with stainless steel fasteners for superior corrosion resistance and durable enclosures that can be metallic or plastic, suitable for both indoor and outdoor use with optional rain covers or protective casings (Shenhai).

Explosion-Proof Design: Integrated chambers allow multiple circuits in a single enclosure, with cable entry devices that prevent sparks and ignition in hazardous zones (Shenhai).

Switch and Control Options: Switch handles are usually made of PC material, with optional metal customization. Main and branch switch panels can be color-coded, and handles can be equipped with locks to prevent accidental operation (Shenhai).

Internal Components: Can house circuit breakers, AC contactors, thermal relays, surge protectors, universal switches, fuses, instrument transformers, meters, and push buttons according to user requirements (Shenhai).

Standards Compliance: Conforms to GB/T3836 series, IEC60079 series, ATEX, and IECEx standards, ensuring safe operation in explosive atmospheres (Shenhai, Fivesunsecoenergy).

Applications These distribution boxes are suitable for hazardous environments such as: Oil and gas extraction and refining Chemical processing plants Offshore platforms and tankers Military and defense industries Metal processing and mining operations (Shenhai, Fivesunsecoenergy)

Installation Guidelines Install in a dry, ventilated area with unobstructed access, typically at a standard height of 1.8 meters for convenient operation (SCTR). Ensure the enclosure is intact and undamaged, with proper grounding and separation of neutral and phase lines (SCTR). Use lock nuts for cable...
