

Power Equipment Optical Cable Laying Traction Machine

Overview

Optical cable traction machines are widely used in optical fiber communication, power, and municipal engineering for cable laying and construction. They can lay up to 288-core optical cables in underground, overhead, or pipeline scenarios, with automatic pre-tension. Thorne & Derrick International distribute the most extensive range of Cable Pulling & Cable Laying Equipment to enable the installation of low, medium and high voltage power cables into underground trench or duct – products also supplied for fibre optic blowing, subsea trenching, offshore umbilical. The optical cable traction machine is suitable for 4-288 core optical cable, 7*2.6mm steel stranded wire, 4*35mm² cable. Professional Cable Laying Solution by Keepapexpower company The Apex No. 7 Optical Cable Tractor is a gasoline-powered optical cable tractor featuring a vibrant green body with two large wheels and top-mounted handle. Designed for telecom field operations, it delivers 4200N pulling force with dual. Find reliable fiber optic cable pulling machines for efficient cable management.
