

Price of Horizontal Curve Galvanized Cable Tray

AI Overview

The price of a horizontal curve (90° bend) hot-dip galvanized cable tray typically ranges from \$20 to \$150 per piece, depending on size, material, and manufacturer. Pricing Overview Standard Hot-Dip Galvanized Ladder Cable Tray: Prices for straight sections (2.4 meters) generally start around \$50–\$100 per tray, with fittings such as horizontal bends priced separately per piece. Horizontal 90° Bends: For medium-duty or heavy-duty hot-dip galvanized trays, 90° horizontal bends are available in various widths (e.g., 12", 18", 24") and heights (4"–6"), with prices ranging approximately \$20–\$150 per unit, depending on dimensions and load capacity. Material and Finish: Hot-dip galvanized (HDG) bends are more corrosion-resistant and suitable for both indoor and outdoor use, which can increase the cost compared to pre-galvanized or aluminum options. Accessories: Couplers, tees, and crossovers for connecting bends to straight trays are sold separately, typically in pairs, and may cost \$5–\$30 per piece depending on size and duty rating. Factors Affecting Price Tray Width and Height: Larger trays require more material, increasing the cost of bends. Duty Rating: Light, medium, and heavy-duty trays have different thicknesses and load capacities, affecting pricing. Manufacturer and Region: Prices vary by supplier and shipping location; international suppliers like Jiangsu Holdee Electric Co., Ltd. offer competitive pricing for bulk orders. Customization: OEM or custom-sized bends may incur additional costs. Recommendation For accurate budgeting, it is advisable to specify the tray width, height, and duty rating when requesting quotes from suppliers. Many suppliers provide online price lists or respond to inquiries with detailed quotations for horizontal bends and other fittings. By considering these factors, you can select the appropriate hot-dip galvanized horizon...
