

Price of Ladder-Type Double-Layer Cable Trays

AI Overview

Double-sided ladder cable trays typically range from \$50 to \$150 per 2.4-meter section, depending on material, width, and load capacity.

Pricing Overview

The cost of double-sided ladder cable trays varies based on material, size, and finish:

Material: Steel (hot-dip galvanized, electro-galvanized), stainless steel (304 or 316), aluminum, or fiberglass. Stainless steel and aluminum options are generally more expensive due to corrosion resistance and durability.

Width: Common widths include 150mm, 300mm, and 450mm. Wider trays that support heavier cable loads cost more.

Length: Standard sections are usually 2.4 meters long. Prices are often quoted per section.

Finish: Hot-dip galvanized trays are more durable and slightly higher in price than plain steel, while powder-coated or stainless steel trays offer additional corrosion protection.

Estimated Price Range

Hot-dip galvanized steel, 2.4m section: Approximately \$50–\$80 per section.

Stainless steel (304/316), 2.4m section: Approximately \$100–\$150 per section.

Aluminum or fiberglass trays: Prices vary widely, typically \$80–\$140 per section depending on load capacity and manufacturer.

Additional Considerations

Accessories: Fittings, splices, covers, and supports are priced separately, usually per piece, and can add 10–30% to the total installation cost.

Load capacity: Heavier-duty trays designed for high-voltage or large cable bundles may cost more.

Delivery and installation: Some suppliers offer same-day or next-day delivery, which may affect overall cost.

For accurate pricing, it is recommended to contact suppliers directly with specifications such as tray width, material, and required length. Suppliers like RS PRO, Legrand, and McMaster-Carr provide detailed datasheets and quotations for industrial ladder cable trays.
