

Price of Swiss Waterproof Lighting Distribution Box

AI Overview

The price of a Swiss waterproof lighting distribution box typically ranges from \$50 to \$400 or more, depending on size, IP rating, and features. Overview Waterproof lighting distribution boxes are designed for outdoor and industrial environments, providing protection against dust, rain, and UV exposure with IP65-IP68 ratings. They are commonly used for street lighting, gardens, billboards, and solar systems, and come in plastic or metal housings with options for DIN rail mounting. Swiss models are often high-quality, CE-certified, and may include additional features such as multiple outlets, expansion capability, and robust internal contact systems. Factors Affecting Price

IP Rating: Higher protection (IP66 or IP68) generally increases cost due to better sealing and materials.

Material: ABS or polycarbonate plastic boxes are lighter and more affordable, while anodized aluminum or metal boxes are more durable and expensive.

Size and Capacity: Boxes with more outlets or larger internal compartments for wiring and modules cost more.

Supplier and Certification: Swiss or European suppliers may charge a premium for CE/ROHS compliance, UV-stabilized housings, and local support.

Customization: Pre-assembled or custom-sized boxes with specific terminal layouts or DIN rail configurations can significantly increase the price.

Typical Price Range

Box Type	Price Range
Small plastic IP65 boxes	\$50-\$120
Medium-sized IP65-IP66 boxes with multiple outlets	\$120-\$250
Large or metal IP66-IP68 boxes with advanced features	\$250-\$400+

For exact Swiss pricing, it is recommended to contact local distributors or suppliers such as SinoBreaker, ZCEBOX, or flex7, as prices vary based on quantity, shipping, and customization.

Recommendation When purchasing, consider the IP rating, material, and number of outlets required for your lighting system. For outdoor installations exposed to sun or rain, UV-stabilized and IP66-rate...
