

Price of a Level 1 Single-Phase Distribution Box

AI Overview

The price of a Level 1 Single-Phase Distribution Box typically ranges from \$20 to \$150 depending on specifications, features, and supplier. Price Range and Factors A basic single-phase distribution box, suitable for residential or light commercial use, generally costs \$20 to \$50 for standard models with minimal circuits and basic protection features. More advanced units with RCD (Residual Current Device) protection, multiple circuits, or smart monitoring capabilities can range from \$80 to \$150 or more. Prices vary based on: Material and build quality: Plastic enclosures are cheaper, while metal or IP-rated weatherproof boxes cost more. Number of circuits: More circuits increase the price due to additional breakers and busbars. Safety features: Integrated surge protection, earth leakage detection, or RCBOs add to the cost. Customization and OEM options: Custom enclosures, branding, or special busbar configurations can increase unit price. Supplier Options Online marketplaces like Alibaba, Made-in-China, and IndiaMART offer a wide range of single-phase distribution boxes with per-unit pricing and bulk discounts. Retail platforms such as Amazon provide smaller, ready-to-install units suitable for DIY or small-scale installations. Local electrical suppliers may offer competitive pricing and installation services, often including warranty and compliance with local electrical codes. Additional Considerations Installation costs: Hiring a licensed electrician is recommended, which may add \$50–\$150 depending on complexity and location. Compliance: Ensure the box meets local standards (e.g., NEC, IEC, or BS 7671) and is suitable for indoor or outdoor use. Future expansion: Choosing a box with spare ways or modular design can save costs if additional circuits are needed later. In summary, a Level 1 Single-Phase Distribution Box can be purchased for as low as \$20 for basic models, while...
