

Price of outdoor power distribution box hollow frame

OM1 Fiber Patch Cable Family

AI Overview

Outdoor power distribution boxes with hollow frames typically range from \$50 to \$500 or more, depending on size, material, and configuration. Price Range and Factors The cost of an outdoor power distribution box depends on several factors: Size and Number of Ways: Smaller boxes (e.g., 5-way or 9-way) are generally priced lower, around \$50–\$150, while larger boxes (e.g., 24-way or 36-way) can cost \$300–\$500+. Material and Durability: Boxes made from cold-rolled steel with powder-coated finishes or corrosion-resistant metals are more expensive due to their long-term durability in harsh outdoor conditions. Protection Rating: IP-rated enclosures (IP65 or higher) that protect against water, dust, and UV exposure may increase the price. Phase Type and Load Capacity: Single-phase boxes for low to moderate power demands are cheaper, while three-phase boxes for industrial applications are more costly. Brand and Certification: CE, UL, or ISO-certified boxes from reputable manufacturers may carry a premium. Where to Buy Alibaba and Made-in-China: Offer a wide range of hollow frame outdoor distribution boxes with customizable sizes and configurations, often sold in bulk for industrial use. Home Depot, Lowe's, Amazon: Provide ready-to-install outdoor breaker boxes suitable for residential or small commercial applications, with prices typically starting around \$50–\$200 for standard models. Recommendation When selecting a hollow frame outdoor power distribution box, consider your load requirements, environmental exposure, and future scalability. For industrial or high-capacity needs, investing in a durable, corrosion-resistant, and IP-rated box is recommended, even if the initial cost is higher. For residential or temporary setups, smaller, pre-configured boxes from retail suppliers may be more cost-effective.
