

Recessed type distribution box

AI Overview

A recessed distribution box is an electrical enclosure installed flush within a wall or floor to house circuit breakers, fuses, and other protective devices, providing organized and safe distribution of electricity.

Overview A recessed distribution box (also called a flush-mounted electrical panel or cabinet) is designed to be embedded into walls or floors, offering a clean, space-saving installation while protecting electrical circuits. It is a key component in electrical systems, dividing installations into circuits and safeguarding them with fuses, miniature circuit breakers (MCBs), and residual current devices (RCDs) for safety and control.

Types and Materials

- Metal Recessed Boxes:** Provide high durability and impact resistance, often rated with IP40 for dust protection and IK07 for mechanical impact resistance.
- Plastic or ABS Boxes:** Lightweight and corrosion-resistant, suitable for residential or light commercial use.
- Floor Recessed Boxes:** Specifically designed for sockets or outlets positioned on the ground, offering protection and easy access.

Module Capacity Recessed distribution boxes come in various sizes, typically measured by the number of modules they can accommodate:

- Small:** 8–12 modules
- Medium:** 14–28 modules
- Large:** 36–56 modules
- Extra-large:** Up to 72 modules for residential or commercial projects

Features

- Flush-Mounting:** Installed within walls or floors for a neat appearance.
- Removable Frames:** Facilitate installation and maintenance of internal components.
- Ergonomic Doors:** Transparent or smoked lids with easy opening and closing systems, sometimes with double spring locks for security.
- Interlinkable Design:** Allows modular expansion for larger electrical systems.
- Grounding Terminals:** Ensure safe earthing of the electrical system.

Applications Recessed distribution boxes are widely used in:

- Residential buildings** for main and sub-distribution panels
- Commercial and office spaces** for organized electrical distribution
- Floor installations** for power outlets in open areas or conference rooms
