

Selling pigtail melting trays

AI Overview

You can sell pigtail melting trays through specialized suppliers, industrial equipment marketplaces, or directly to businesses in the metal processing industry. Suppliers for New Melting Trays If you are looking to sell or source new pigtail melting trays, companies like AGP Thermo provide a wide range of crucibles, trays, and melting vessels for precious metals and chemical industries, offering customization and prototyping for specific needs. Similarly, Gesswein stocks metal melting supplies including electric melters, graphite and platinum crucibles, and melting dishes suitable for small-scale or professional casting projects. Marketplaces for Used Equipment For selling used pigtail melting trays, online marketplaces such as Exapro and Bid-on-Equipment are ideal. Exapro specializes in pre-owned industrial machinery including melting tanks, boilers, and other metal processing equipment, ensuring buyers can find high-quality, tested equipment. Bid-on-Equipment also allows businesses to list and sell used machinery, providing a fast-growing platform for industrial equipment transactions. Tips for Selling Highlight specifications: Include material type (graphite, platinum, ceramic), capacity, and condition. Provide clear photos: Show the tray from multiple angles and any wear or damage. Target the right audience: Reach out to jewelry makers, metal casters, chemical labs, or industrial manufacturers. Consider bulk sales: Many buyers prefer purchasing multiple trays at once, which can increase interest and value. By combining supplier listings for new trays and industrial marketplaces for used equipment, you can maximize visibility and attract potential buyers efficiently.
