

Swedish-branded LPO aggregation switch

Overview

The STC-40028 from Swedish Telecom Opto's LPO Series is a high-performance 800 Gb/s QSFP-DD SR8 optical transceiver optimized for short-reach, high-bandwidth data-centre and AI workloads. Linear Pluggable Optics (LPO) replace the DSP inside the optical module with linear analog components, shifting signal processing to the host ASIC. This innovation delivers up to 30% lower power consumption, reduced latency, and simplified thermal management — perfect for high-density fabrics and. Provides 1G, 2. 5G, and 10G speeds for flexible customization, ensuring optimal performance, compatibility, and scalability Flexible interface options like copper, fiber, and PoE ensure seamless integration and cost-effective deployment Supports stacking for easier management, improved redundancy. The Cisco QSFP-100G-FR-S 100 GbE transceiver is purpose-built for this providing 100 Gbps per port over single-mode fibre (SMF) using a 1310 nm wavelength with up to 2 km reach. This architecture takes advantage of the capabilities in each segment of the link to form a power, cost. An 8-port, Layer 2 switch made for 10G SFP+ connections. An aggregation switch is a network device that consolidates traffic from multiple access switches, wireless access points, or other edge devices and forwards it to core switches or routers.
