

Temporary distribution box fixing clips

AI Overview

Temporary distribution box fixing clips include cable cleats, mounting brackets, and spring clips designed to secure cables and small distribution boards safely and efficiently. Types of Fixing Clips

1. Cable Cleats and Clamps High-voltage and medium-voltage cable cleats, such as the K36-52 series, are used to secure single or multiple cables in distribution boxes or cable branch boxes. These cleats ensure stability on flat surfaces or structural supports and can replace conventional cable bridges. They are suitable for both low and medium voltage applications and provide protection against cable movement and mechanical stress.
2. Mounting Brackets for Distribution Boards Brackets like the Clipsal Resi MAX accessory are designed for small distribution boards and temporary power service poles. These brackets allow quick and secure mounting of distribution boxes, making them ideal for temporary installations.
3. Spring Clips and Cable Mounts Flexible spring clips or half-loop clamps are used for routing wires, flat cables, or tubing. They provide fast assembly, easy insertion and removal of cables, and can be mounted on panels or surfaces using screws, rivets, or adhesive bases. Nylon mounting brackets and P-style push mount standoff clips elevate cables above panels for organized routing.
4. Extendable Box Strap Brackets Steel strap brackets allow faster mounting of electrical boxes, conduits, or pipework. They are extendable, easy to install, and tested for pull strength on plasterboard surfaces, making them suitable for temporary setups where quick installation is required.

Installation Considerations

Surface Compatibility: Ensure clips or brackets are compatible with the mounting surface (metal, wood, plasterboard, or concrete).

Cable Size: Select clips that accommodate the diameter of the cables or bundles. Adjustable or modular clips offer flexibility.

Temporary vs Permanent: For temporary setups, choose clips that allow easy removal without damaging cables or panels.

Material: Nylon or polyamide clips...
