

Types of Fireproof Cable Trays in Ghana

AI Overview

High-quality fire-resistant cable trays in Ghana include fiberglass (FRP/GRP), galvanized steel with fireproof coatings, and fire-rated polyester or aluminum trays, offering 60–120 minutes of fire protection.

Types of Fire-Resistant Cable Trays

- 1. Fiberglass (FRP/GRP) Cable Trays** These trays are made from pultruded fiberglass reinforced with polyester or vinylester resins, providing excellent fire resistance, corrosion resistance, and durability. They are lightweight, non-conductive, and suitable for industrial environments such as power plants, refineries, and chemical plants. Polyester fire-retardant (FR-P) is commonly used for general applications, while vinylester fire-retardant (FR-VE) is ideal for highly corrosive environments.
- 2. Galvanized Steel with Fireproof Coating** Channel cable trays made from cold-rolled steel with a fireproof coating offer high load-bearing capacity and long service life. The coating forms a spongy carbonized layer under high temperatures, protecting the steel structure and preventing collapse during fire incidents. These are suitable for fire control rooms, fire pumps, and smoke ventilation systems.
- 3. Fire-Rated Aluminum and Stainless Steel Trays** Manufacturers like NewReach provide fire-rated trays with specialized powder coatings or intumescent layers, capable of withstanding temperatures up to 1050°C for 2 hours. These trays maintain structural integrity under fire, ensuring critical systems like emergency lighting and fire alarms remain operational.
- 4. Arc-Shaped and Prefabricated Fire-Resistant Trays** Some fire-resistant trays feature arc-shaped designs for curved installations, reducing cable stress and improving aesthetics. They typically have a 5–12 mm fireproof core and can achieve N1 fire ratings (60 minutes of fire resistance), suitable for modern architectural projects.

Key Features to Consider

- Fire Resistance Rating:** Look for trays rated for at least 60 minutes (N1) or higher depending on project requirements.
- Material:** FRP/GRP for corrosion resistance, galvanized steel for high l...
