

UAE Galvanized Cable Tray Specifications

AI Overview

Galvanized cable trays in the UAE are manufactured to international standards, offering high load capacity, corrosion resistance, and versatile installation options for industrial and commercial applications.

Types of Galvanized Cable Trays

- Ladder Type Cable Trays** – Ideal for heavy-duty cable runs, providing maximum ventilation and support for power and control cables.
- Perforated Cable Trays** – Lightweight and suitable for data and light cabling, allowing airflow and easy cable fastening.
- Wire Mesh or Basket Trays** – Designed for flexible routing of data and communication cables, easy to cut and install on-site.
- Solid Bottom Trays** – Used where additional protection from dust or debris is required.

Material and Finish

- Galvanized Steel (GI/Pre-Galvanized)** – Complies with BS EN 10142 standards.
- Hot Dip Galvanized (HDG)** – Conforms to BS EN ISO 1461, providing superior corrosion resistance for outdoor and coastal environments.
- Stainless Steel Options** – SS304 and SS316L for highly corrosive or chemical environments.
- Powder Coated or Epoxy Polyester Finishes** – Available in RAL colors for aesthetic or specialized applications.

Load and Structural Specifications

- Designed to support both light and heavy electrical loads, suitable for industrial, commercial, and oil & gas facilities.
- Reinforced thickness and structural design ensure high load-bearing capacity and long-term durability.
- Compliance with ISO 9001:2008 quality standards ensures dimensional accuracy, tensile strength, and hardness.

Accessories and Installation

- Complete accessory range including bends, junctions, reducers, and covers for customized layouts.
- Slot size for strut systems and accessories typically 25.12 mm, compatible with standard fittings.
- Engineered for ease of installation, low maintenance, and long service life.

Applications

- Suitable for indoor and outdoor installations, including commercial buildings, industrial plants, data centers, and energy facilities.
- Resistant to corrosion, fire, and electromagnetic interference, making them ideal for harsh UAE environments.
- Can be used in coastal...
