

What is LP Low-Level Distribution Box

Overview

Lighting Panel (LP) sub-distribution boards offer the right low voltage (LV) solution for large buildings by dividing the electrical power feed into subsidiary circuits. They are manufactured from high-quality materials and contain the latest safety features. IF YOU ARE NOT A QUALIFIED ELECTRICIAN, you should exercise extreme caution when commenting. Please contact the moderators of this subreddit if you have any questions or concerns. Its design must account for transformer capacity, available fault current, and the true demand of downstream loads. According to the principle of graded lightning protection, and based on the likelihood of a building being struck. The ABB MNS® low voltage distribution board and power cabinet are a new set of modular and multipurpose low-voltage products.
