

What is the price range for optical splitters in Malaysia

AI Overview

Optical splitters in Malaysia typically range from around RM20 to RM300, depending on type, port count, and quality.

Overview of Pricing

- 1x2 Splitters:** Entry-level splitters such as SC/UPC 1x2 PLC splitters are priced around RM20 to RM50 per unit, suitable for small-scale FTTH or PON deployments (Shopee, TikTok Shop).
- 1x4 Splitters:** These are slightly higher in cost, generally RM40 to RM80, depending on connector type (SC/APC or SC/UPC) and manufacturer.
- 1x8 to 1x16 Splitters:** Mid-range splitters for larger networks are priced between RM80 and RM150, often in ABS cassette or PLC format with high reliability and environmental stability.
- 1x32 to 1x64 Splitters:** High-capacity splitters for extensive PON networks can cost RM200 to RM300 or more, reflecting the complexity and precision of the planar lightwave circuit (PLC) technology used.

Factors Affecting Price

- Splitter Type:** PLC (Planar Lightwave Circuit) splitters are more expensive than FBT (Fused Biconical Taper) splitters due to better uniformity and reliability.
- Port Count:** Higher port counts increase cost due to more complex fabrication and testing requirements.
- Connector Type:** SC/APC connectors are generally more expensive than SC/UPC due to lower return loss and better performance.
- Environmental Specifications:** Splitters rated for wide temperature ranges (-40°C to 85°C) or outdoor use may cost more.
- Vendor and Brand:** Prices vary across online marketplaces like Shopee, TikTok Shop, Beecost, and BigGo, with promotions or bulk discounts affecting the final price.

Summary

For typical FTTH or PON network deployments in Malaysia, small-scale splitters (1x2, 1x4) cost RM20–RM80, mid-range splitters (1x8, 1x16) cost RM80–RM150, and high-capacity splitters (1x32, 1x64) cost RM200–RM300+. Prices may fluctuate based on vendor, specifications, and promotions, so checking multiple online sources is recommended.
