

## Where can I find double-bridge Israeli cable trays

### AI Overview

Double-bridge Israeli cable trays can be sourced through specialized electrical suppliers, industrial distributors, or international manufacturers offering cable tray bridges and modular systems. Potential Suppliers and Platforms:

- Bahra Electric** – Offers a wide range of cable trays suitable for industrial and commercial applications, including metal and non-metallic options with modular designs that can accommodate complex configurations like double-bridge setups (Bahra Electric).
- Alibaba** – Features cable tray bridges made from carbon steel, stainless steel, and aluminum, with customizable sizes and CE certification. Many suppliers provide industrial-grade cable tray bridges that can be adapted to double-bridge configurations (Alibaba).
- BIMObject** – Provides downloadable BIM objects for cable trays and horizontal racks from over 2,000 manufacturers. This platform allows you to model and specify double-bridge cable trays in Revit, SketchUp, or ArchiCAD before purchase (BIMObject).
- Cable Tray Institute (CTI)** – While not a direct supplier, CTI offers standards, guidelines, and manufacturer references for cable tray systems, including bridge configurations. Consulting CTI resources can help ensure compliance with NEC and NEMA standards when sourcing double-bridge trays (Cable Tray Institute).

**Tips for Sourcing:**

- Specify Material and Load Requirements:** Double-bridge trays often require high mechanical strength. Carbon steel or stainless steel is recommended for heavy-duty or corrosive environments.
- Check Local Distributors in Israel:** Many international suppliers ship to Israel, but local distributors may provide faster delivery and support for installation.
- Use BIM Models for Planning:** Downloading BIM objects allows you to verify dimensions, load capacity, and compatibility with your facility layout before ordering.
- Certifications:** Ensure the trays meet CE, UL, or I...
