

Where is a good micro-module data center in Laos

AI Overview

For a reliable micro-module data center in Laos, the LEED-certified GDMS facility in Vientiane and the private LaoDC data center in Hatxaykhao are top options. Key Options

1. **GDMS LEED Data Center, Vientiane** This state-of-the-art facility is operated in partnership with the Ministry of Technology and Communication and is designed to meet international standards, including LEED certification for sustainability and energy efficiency (Global Digital Management Solutions, 2023) . It offers robust infrastructure, cloud services, and secure hosting, making it suitable for enterprises seeking modular or micro-module deployments. The center benefits from low-cost energy, abundant land, and strong government support, ensuring reliability and compliance with local data sovereignty regulations .
2. **LaoDC Private Data Center, Hatxaykhao** LaoDC is the first licensed private data center in Laos, built to international standards with ISO certification and emergency backup systems, including diesel generators and a solar plant for green energy . It provides a range of IT services such as web hosting, email hosting, off-site backup, and integrated business IT solutions. The facility is designed to support small to medium-sized enterprises as well as larger organizations, offering modular setups that can scale according to client needs .

Considerations for Choosing a Micro-Module Data Center

Regulatory Compliance: Laos mandates that private companies host data in MTC-approved facilities, ensuring data sovereignty and security .

Energy Efficiency: Both GDMS and LaoDC leverage green energy solutions, which is advantageous for cost-effective and sustainable operations .

Technical Support: Local technical teams provide on-site support, training, and consulting, which is critical for micro-module deployments .

Scalability: Modular designs allow for incremental expansion, making...
