

Wide-temperature industrial switch module

Overview

The DIS switches are designed to easily handle hot and cold temperature variances,* and can cold start at their coldest temperatures. They provide continuous uptime, manageability, and operational efficiency. With flexible PoE options of IEEE 802.3bt. Industrial-grade, full 10GbE 16-port switch with wide temperature support and wide voltage redundant power supply. Designed for harsh industrial environments, the QSW-IM3216-8S8T high-speed switch features a fanless IP20-rated enclosure with a redundant DC 9-54V power supply. Unmanaged switches are the simplest active network. PLANET Industrial 8-port Gigabit 802. Thus, the IGS-10020HPT series provides a high level of immunity against electromagnetic interference and heavy electrical. In the realm of I/O modules and data transmission, Neo Wave presents robust industrial switches designed to meet the demanding requirements of modern manufacturing and automation environments.
